Ralph de Sandwyco in propriâ personâ went to the wood of the Abbot of St. Peter of Gloucester of Hope Moloysel and learnt from the foresters and verderers and other lawful men of those parts, and by his own view, that it would not be to the damage or hurt of the King, or of his Forest of Dene, or of the men of those parts, if the King should grant to the Abbot of Gloucester to cut down that wood in 4 years by quarters and to take his profit thereof, because that wood is old underwood and thick, and less fit for the beasts to feed in than the wood which would grow anew, and that as well wolves, as injurers of the venison, frequently return for the venison and stay in the said wood on account of the thickness thereof, so nevertheless that each quarter shall be enclosed with a low hedge (bassahaye) for 3 years, so that our beasts may go in and out, so that if the cattle of the men of those parts should enter that wood for default of enclosure they shall not be impounded on this account.
