## John Wawepol.

**I**nquisition made at Wynth' before the sheriff of Gloucester by *Henry de Cotes, Adam Sparuwe, Peter de Coulne, Robert de Aldrinton, Richard le Pestur, Henry Tinctor, William atte Hulle, Nicholas Molend' de Twenigg', Robert de Morcote, John de Clyve, Hugh le Dispenser, and Peter de la Fermer*, to inquire if it be to the damage of the King or others if the King should grant to *John Waupol* of Wenlond that he may give one messuage and 2 virgates of land in Throp next Wynth' to the Abbot and Convent of Wynth' and to their successors for ever, who say that

It is not to the damage of the King or others, but rather to the advantage of the King, because at the time of the vacation of the Abbey of Wynth' the King will have the custody of that land, which formerly he had not. The messuage and land are held of the said Abbot of Wynch' and of no other by the service of 2s., so that in all issues beyond the said rent they are estimated to be of the value of 9s. 3d. by the year, and the lands and tenements which remain to the said John suffice to do the customs and services due as well for the aforesaid messuage and lands given as for other tenements retained by him, and for all other charges which they sustained and were wont to sustain, as in suits, to wit, views

of frank pledge, aids, tallage, vigils, fines, redemptions, amercements, contributions, and other charges whatsoever issuing to be sustained. And the said *John* may be put in assizes, juries, and other recognizances whatsoever as he was wont to be put before the said gift, and that the county by the said gift or assignment shall not be charged more than is wont by the default of the said *John*.

The said premises are held of Sir *John de Suthleye* by the service of the yearly rent of 1 pair of boots and 1 monk's girdle with a knife hanging therefrom and one needle with a point (*uno agulari cu' acu*), from whom the said Abbot de Bruere has full licence to transfer and assign the said premises to the said Abbot and Convent of Wynchecumb, and they are worth per annum, clear, 19s. 4d., because it is heath which is called wood.

The said *William* may give the said manor and hamlets and all other the appurtenances in co. Gloucester to the said Abbot and Convent and their successors without damage of the King or others, because whatever accrues to the portion of the Abbot of Westminster will accrue to the King in the time of a vacancy, and so it will to the profit of the King and not to his damage.

It will not be to the damage of the King or others if *John le Knyght* should give to the Abbot and Convent of Kyngeswode 2 parts of 1 messuage and 1 virgate of land in Colkerton, because they are held of the said Abbot and Convent without mean by the service of 3s. by the year for all service, except in this that that tenement owes suit at the hundred of Langetre twice in the year, which hundred the Abbot of Cirencester holds of the King in chief at fee farm.

## Preface.

---

No little confusion has in the past been caused by the use of an incorrect term to the class of documents here printed, for although it was usual to direct the writs to the County Escheator, it is none the less misleading to describe these Inquisitions as "Escheats," since that name has been reserved for the Escheator's accounts of lands and property escheated to the Crown, with the profits and value of the same at different periods.

Inquisitiones post mortem were not concerned with property held otherwise than "in chief" by tenants *in capite*, whose death necessitated such inquiry in order to ascertain the feudal rights which accrued to the Crown—a practice which continued until the abolition of the service of knight serjeantry in 1645, although it was not formally abolished until the accession of Charles the Second in 1660. It is unnecessary to enter into the details of feudal exactions levied by the Crown in former days, but an interesting "incident" of the service may be referred to. When the heir-at-law was a minor he became a ward of the Crown, and this was turned into a source of considerable profit, inasmuch as it first included the right not only to receive the rents and profits of the property during the ward's minority, but also to find a wife for the youthful heir. Nor did the privilege end there, for on attaining his majority the heir became the subject of further feudal exactions, being obliged, on suing out his ousterlemain (*i.e.*, delivery to him by the Crown of the lands for which he was in ward) to make certain payments, and to bring forward strict proof that he had attained his full age of twenty-one years. Some few of the Inquisitions, known as "proofs of age" will be found in this volume, and they are very interesting documents on account of the evidence brought forward by witnesses to show how they knew that the heir had attained his majority. Amongst the Inquisitiones post mortem are also some taken *virtute officii*, others *ad quod damnum*, besides those dealing with the property of felons. Instances of Inquisitions relating to lunatics and idiots do not, however, occur in these pages.

The proceedings which followed upon the death of a tenant in chief were commenced by the issuing of a writ, styled the writ of *diem clausit extremum*, a mediæval synonym for *obit*, directed from the Court of Chancery to the escheator or feodary of the county in which the deceased was presumed to have possessed lands. It commanded him to summon a jury for the purpose of conducting an inquiry into the following matters:—

1. Of what lands did the deceased die possessed?
2. Of whom, and by what rents or services, were the same held?
3. What was the date of his death?
4. His next heir-at-law, and of what age?
5. Whether an alien, or attainted of treason?

The escheator or feodary, following the directions contained in the writ, then summoned a jury, who in accordance with the revealed evidence gave their verdict upon oath; and after the return had been engrossed upon parchment, it was in due course delivered into the Court of Chancery and there filed. Owing to the nature of the inquest it was frequently necessary to inquire into family settlements and trusts; consequently when deeds and wills are introduced they are recited very fully, thus affording valuable information to the genealogist.

Into the Exchequer the Chancery officials subsequently forwarded a copy of the Inquisition so that the officers there might collect the feudal dues. If it was discovered that the jury had made an inaccurate return, a further writ, known as the writ *ad melius inquirendum*, was directed to the escheator or his substitute, requiring him to hold a second inquest to ascertain omitted facts, and cases even are known in which this process had to be repeated a third or fourth time. But in the reign of Henry VIII, on account of alleged extortions by Crown officials, and the practice more especially of compelling landowners who were *not* tenants *in capite* to sue out their ousterlemains, a new Court, known as that of Wards and Liveries, was created for the purpose of attending to matters connected with these Inquisitions—to which Court also were transcripts of the Inquisitiones post mortem sent. Until the thirty-fifth of Henry VIII, therefore, two sets of Inquisitions exist, the original returns being known as the “Chancery Series,” and the transcripts as “Exchequer Series”; and subsequent to that date may be added a third, the “Wards and Liveries Series.”

It is not to be denied that many of our English counties are fortunately circumstanced with respect to the publication of their important records. That Gloucestershire is one of these, a glance at the new list of publications of the British Record Society will show. All the Inquisitiones post mortem for the reign of Charles I have been printed,\* and now it is the turn of the earliest series of all, commencing with the twentieth year of Henry III [1236]. Had the expedient been adopted of giving mere selections the work would have surely failed, but a course far wiser than this has been followed throughout: abstracts have ever been *full*, and periods *complete*: so that its success has been most marked. How complete the records are may be judged from the fact that Inquisitions for Gloucestershire to the number of four-score are printed for the reign of Henry III alone; and as regards the thoroughness of the work, this will be readily admitted from a perusal of the examples given in these pages.

The present volume, the fourth of a series, consists of such Plantagenet Inquisitions as relate to the City and County of Gloucester. They are the earliest examples now existing, and illustrate clearly the importance of these Records to the genealogist, the historian, and topographer. Commencing with the Inquisition of William Avenel, the writ for which was issued at Westminster on May 5th, 1236, this volume contains complete abstracts for the last thirty-six years of the reign of Henry III and for the greater part of the reign of his successor "the English Justinian," the total number of Inquisitions being as under:—

The period included in the present instalment of Inquisitiones post mortem for the Plantagenet period is thus seen to cover the years

\* In Vols. ix. xiii. and xxi.

1236 to 1300, and it may be mentioned that arrangements have been completed whereby a considerable portion of the Inquisitions for the reigns of Edward II and Edward III will appear in the "Index Library" during 1904 and 1905, and the usual thorough Indexes Nominum et Locorum will be published as soon as the last Inquisitions of this period issue from the press. This is believed to be the better course to follow, since it has the advantage not only of hastening forward the completion of work now well in hand—thus preventing the annoyance of a prolonged pause (due both to preparation and to publication of the periodic Index)—but also of avoiding an undue multiplicity of indexes.

The abstracts of *Inquisitiones post mortem* here printed are taken from the Chancery Series for the reigns of Henry III and Edward I, preserved at the Public Record Office; and since the original documents are in Latin, and their decipherment, on account of age and condition, at times a source of perplexity, even to the practised eye of the expert, the great advantage of these readable English abstracts will be readily allowed no less by the critic than the student. For they supply in each case the whole of the information contained in the originals, and for all practical purposes may therefore be considered as the Inquisitions themselves, shorn of their provoking verbiage. They have the advantage, moreover, of having been collated, whenever necessary, with the transcripts returned either into the Court of Exchequer or the Court of Wards and Liveries. For this much praise is due to Miss Walford, upon the accuracy of whose work every reliance may be placed.
